Candidate SN−selective representative GO themes
membrane docking
regulation of meiotic cell cycle
metaphase/anaphase transition of mitotic cell cycle
actin polymerization or depolymerization
positive regulation of phosphate metabolic process
positive regulation of lamellipodium organization
viral budding from plasma membrane
midbody abscission
connective tissue development
binding of sperm to zona pellucida
regulation of mitotic spindle assembly
viral process
regulation of cell growth
positive regulation of cell migration
rhythmic process
establishment or maintenance of epithelial cell apical/basal polarity
thymus development
mononuclear cell differentiation
somatic stem cell population maintenance
neural nucleus development
cellular response to lectin
regulation of striated muscle cell differentiation
regulation of reactive oxygen species metabolic process
ameboidal−type cell migration
positive regulation of small molecule metabolic process
respiratory burst
transforming growth factor beta production
negative regulation of G protein−coupled receptor signaling pathway
learning or memory
dorsal/ventral axis specification
positive regulation of nitric oxide biosynthetic process
behavior
regulation of glucose metabolic process
synaptic transmission, glutamatergic
bone resorption
regulation of cytosolic calcium ion concentration
detection of chemical stimulus involved in sensory perception of smell
cellular response to mechanical stimulus
cell maturation
