SN13 −− GO BP enrichment
positive regulation of cell development
mononuclear cell differentiation
positive regulation of protein modification process
positive regulation of response to external stimulus
positive regulation of leukocyte differentiation
positive regulation of apoptotic signaling pathway
telomere maintenance
cellular response to radiation
telomere organization
epigenetic regulation of gene expression
response to gamma radiation
intrinsic apoptotic signaling pathway by p53 class mediator
cellular senescence
response to salt stress
positive regulation of interleukin−2 production
