SN30 −− GO BP enrichment
small GTPase−mediated signal transduction
positive regulation of cell adhesion
actin filament organization
cell surface receptor protein serine/threonine kinase signaling pathway
regulation of actin filament organization
lamellipodium organization
ERBB signaling pathway
T cell receptor signaling pathway
positive regulation of supramolecular fiber organization
mitophagy
positive regulation of lamellipodium organization
lamellipodium assembly
positive regulation of lamellipodium assembly
cellular response to nitrogen starvation
positive regulation of actin nucleation
