SN31 −− GO BP enrichment
regulation of mitotic cell cycle
intrinsic apoptotic signaling pathway
positive regulation of programmed cell death
regulation of apoptotic signaling pathway
regulation of protein modification by small protein conjugation or removal
canonical NF−kappaB signal transduction
cell surface receptor protein serine/threonine kinase signaling pathway
regulation of chromosome organization
regulation of reproductive process
protein K11−linked ubiquitination
regulation of chromosome segregation
metaphase/anaphase transition of mitotic cell cycle
anaphase−promoting complex−dependent catabolic process
regulation of meiotic cell cycle
protein branched polyubiquitination
