SN36 −− GO BP enrichment
small GTPase−mediated signal transduction
response to nutrient levels
regulation of protein catabolic process
macroautophagy
actin filament organization
regulation of anatomical structure size
protein−containing complex disassembly
regulation of protein modification by small protein conjugation or removal
regulation of synapse organization
establishment or maintenance of epithelial cell apical/basal polarity
autophagy of mitochondrion
autophagosome maturation
cellular response to nitrogen starvation
modification of synaptic structure
positive regulation of fibroblast proliferation
