SN43 −− GO BP enrichment
positive regulation of protein modification process
regulation of transferase activity
intrinsic apoptotic signaling pathway
regulation of apoptotic signaling pathway
regulation of protein kinase activity
regulation of kinase activity
mitotic cell cycle phase transition
cellular response to organic cyclic compound
protein localization to nucleus
regulation of DNA−binding transcription factor activity
negative regulation of cell cycle
regulation of protein catabolic process
regulation of mitotic cell cycle phase transition
cellular response to transforming growth factor beta stimulus
regulation of protein localization to nucleus
