SN47 −− GO BP enrichment
positive regulation of protein modification process
positive regulation of phosphorylation
response to nutrient levels
immune effector process
T cell activation
regulation of response to biotic stimulus
immune response−regulating cell surface receptor signaling pathway
intrinsic apoptotic signaling pathway
positive regulation of MAPK cascade
negative regulation of catabolic process
cellular response to transforming growth factor beta stimulus
response to transforming growth factor beta
ERK1 and ERK2 cascade
cellular response to insulin stimulus
hormone−mediated signaling pathway
