SN50 −− GO BP enrichment
NK T cell differentiation
pons development
growth plate cartilage development
positive regulation of myoblast proliferation
white fat cell differentiation
positive regulation of transforming growth factor beta production
mitotic intra−S DNA damage checkpoint signaling
endochondral bone growth
motor neuron apoptotic process
hepatocyte apoptotic process
myoblast proliferation
detection of biotic stimulus
transforming growth factor beta production
apoptotic process involved in development
positive regulation of mitochondrial membrane permeability involved in apoptotic process
