SN51 −− GO BP enrichment
cellular response to nitrogen compound
cellular response to hormone stimulus
positive regulation of protein modification process
activation of immune response
regulation of growth
cell growth
regulation of cellular catabolic process
regulation of cell growth
cell surface receptor protein serine/threonine kinase signaling pathway
response to radiation
response to transforming growth factor beta
cellular response to transforming growth factor beta stimulus
transforming growth factor beta receptor superfamily signaling pathway
insulin receptor signaling pathway
ERBB signaling pathway
