SN53 −− GO BP enrichment
mRNA splicing, via spliceosome
response to nutrient levels
intrinsic apoptotic signaling pathway
regulation of apoptotic signaling pathway
post−transcriptional regulation of gene expression
cellular response to nutrient levels
nucleocytoplasmic transport
negative regulation of catabolic process
cellular response to transforming growth factor beta stimulus
response to transforming growth factor beta
protein−RNA complex assembly
protein−RNA complex organization
regulation of proteasomal ubiquitin−dependent protein catabolic process
nuclear−transcribed mRNA catabolic process, nonsense−mediated decay
mitophagy
