SN57 −− GO BP enrichment
morphogenesis of an epithelium
protein localization to membrane
regulation of transferase activity
regulation of protein kinase activity
positive regulation of MAPK cascade
adenylate cyclase−modulating G protein−coupled receptor signaling pathway
ERK1 and ERK2 cascade
regulation of protein localization to membrane
formation of primary germ layer
autophagosome assembly
mitophagy
regulation of fibroblast proliferation
cellular response to nitrogen starvation
cAMP/PKA signal transduction
autophagosome maturation
