SN6 −− GO BP enrichment
positive regulation of cellular component biogenesis
regulation of actin filament−based process
activation of immune response
regulation of actin filament organization
positive regulation of cell projection organization
response to nutrient levels
actin polymerization or depolymerization
protein polymerization
regulation of plasma membrane bounded cell projection assembly
positive regulation of supramolecular fiber organization
reactive oxygen species metabolic process
lamellipodium organization
lamellipodium assembly
Rac protein signal transduction
cellular response to nitrogen starvation
