SN66 −− GO BP enrichment
mRNA splicing, via spliceosome
response to nutrient levels
ribonucleoprotein complex biogenesis
response to virus
cellular response to starvation
protein−RNA complex assembly
protein−RNA complex organization
defense response to virus
regulation of protein ubiquitination
regulation of protein serine/threonine kinase activity
autophagosome assembly
biological process involved in interaction with host
mitophagy
regulation of fibroblast proliferation
nuclear−transcribed mRNA catabolic process, nonsense−mediated decay
