SN68 −− GO BP enrichment
post−transcriptional regulation of gene expression
response to nutrient levels
canonical NF−kappaB signal transduction
intrinsic apoptotic signaling pathway
regulation of autophagy
regulation of apoptotic signaling pathway
positive regulation of cell adhesion
negative regulation of catabolic process
regulation of protein catabolic process
macroautophagy
cellular response to nutrient levels
regulation of protein modification by small protein conjugation or removal
positive regulation of DNA−binding transcription factor activity
regulation of binding
mitophagy
