SN72 −− GO BP enrichment
response to nutrient levels
positive regulation of response to external stimulus
regulation of response to biotic stimulus
positive regulation of cell migration
positive regulation of locomotion
regulation of protein catabolic process
regulation of innate immune response
positive regulation of defense response
autophagosome assembly
regulation of protein localization to membrane
regulation of proteasomal protein catabolic process
mitophagy
cellular response to nitrogen starvation
positive regulation of fibroblast proliferation
autophagosome maturation
