SN77 −− GO BP enrichment
response to nutrient levels
regulation of anatomical structure size
regulation of leukocyte activation
positive regulation of protein modification process
autophagosome assembly
vacuole organization
mitophagy
protein−containing complex disassembly
regulation of synapse structure or activity
cellular response to nitrogen starvation
autophagosome maturation
regulation of reactive oxygen species metabolic process
positive regulation of supramolecular fiber organization
positive regulation of fibroblast proliferation
regulation of modification of synaptic structure
