SN79 −− GO BP enrichment
chromosome organization
response to nutrient levels
recombinational repair
regulation of chromosome organization
response to ionizing radiation
transcription initiation at RNA polymerase II promoter
nuclear receptor−mediated signaling pathway
regulation of double−strand break repair via homologous recombination
cellular response to ionizing radiation
chaperone−mediated protein folding
regulation of muscle cell apoptotic process
cellular response to nitrogen starvation
regulation of helicase activity
cellular response to estrogen stimulus
DNA damage response, signal transduction by p53 class mediator resulting in transcription of p21 class mediator
