SN8 −− GO BP enrichment
response to nutrient levels
cellular response to nutrient levels
positive regulation of response to external stimulus
intrinsic apoptotic signaling pathway
cellular component disassembly
regulation of response to biotic stimulus
regulation of cellular response to stress
negative regulation of catabolic process
regulation of protein catabolic process
vacuole organization
autophagosome maturation
autophagosome assembly
regulation of proteasomal protein catabolic process
positive regulation of fibroblast proliferation
regulation of complement activation
