SN81 −− GO BP enrichment
cellular response to nitrogen compound
regulation of cellular response to stress
cellular response to hormone stimulus
positive regulation of protein modification process
intrinsic apoptotic signaling pathway
response to nutrient levels
regulation of apoptotic signaling pathway
regulation of protein kinase activity
regulation of protein stability
cellular response to peptide hormone stimulus
cell surface receptor protein serine/threonine kinase signaling pathway
cellular response to nutrient levels
double−strand break repair
cellular response to chemical stress
response to ionizing radiation
