SN90 −− GO BP enrichment
cellular response to lipid
intracellular receptor signaling pathway
response to nutrient levels
cellular response to organic cyclic compound
protein−DNA complex organization
protein−DNA complex assembly
hormone−mediated signaling pathway
RNA polymerase II preinitiation complex assembly
cellular response to nutrient levels
nuclear receptor−mediated signaling pathway
response to steroid hormone
positive regulation of transcription elongation by RNA polymerase II
miRNA metabolic process
regulation of miRNA metabolic process
vitamin D receptor signaling pathway
