SN91 −− GO BP enrichment
post−transcriptional regulation of gene expression
negative regulation of catabolic process
response to nutrient levels
regulation of growth
regulation of protein catabolic process
cellular response to nutrient levels
protein localization to nucleus
regulation of DNA−binding transcription factor activity
regulation of protein stability
regulation of innate immune response
regulation of ubiquitin−dependent protein catabolic process
nucleocytoplasmic transport
regulation of translation
TOR signaling
peptidyl−serine phosphorylation
