SN92 −− GO BP enrichment
regulation of autophagy
negative regulation of catabolic process
macroautophagy
cellular response to nutrient levels
intrinsic apoptotic signaling pathway
response to starvation
canonical NF−kappaB signal transduction
regulation of protein kinase activity
positive regulation of DNA−binding transcription factor activity
autophagy of mitochondrion
vacuole organization
protein−containing complex disassembly
regulation of protein modification by small protein conjugation or removal
negative regulation of TOR signaling
cAMP/PKA signal transduction
